System Analysis and Design

Lab 6: Information Gathering: Unobtrusive Methods

Date: 23.07.2025

MedRadar

by team **CookiesAndCaches**

Maisha Sanjida - 220041128

Mahdi Islam - 220041149

Obidit Islam - 220041154

Sampling Strategy

Populations Considered:

- **Front-line Pharmacy Staff:** Front-line pharmacy staff who manage stock and update availability on MedRadar.
- **Patients/Customers**– for whom MedRadar is intended

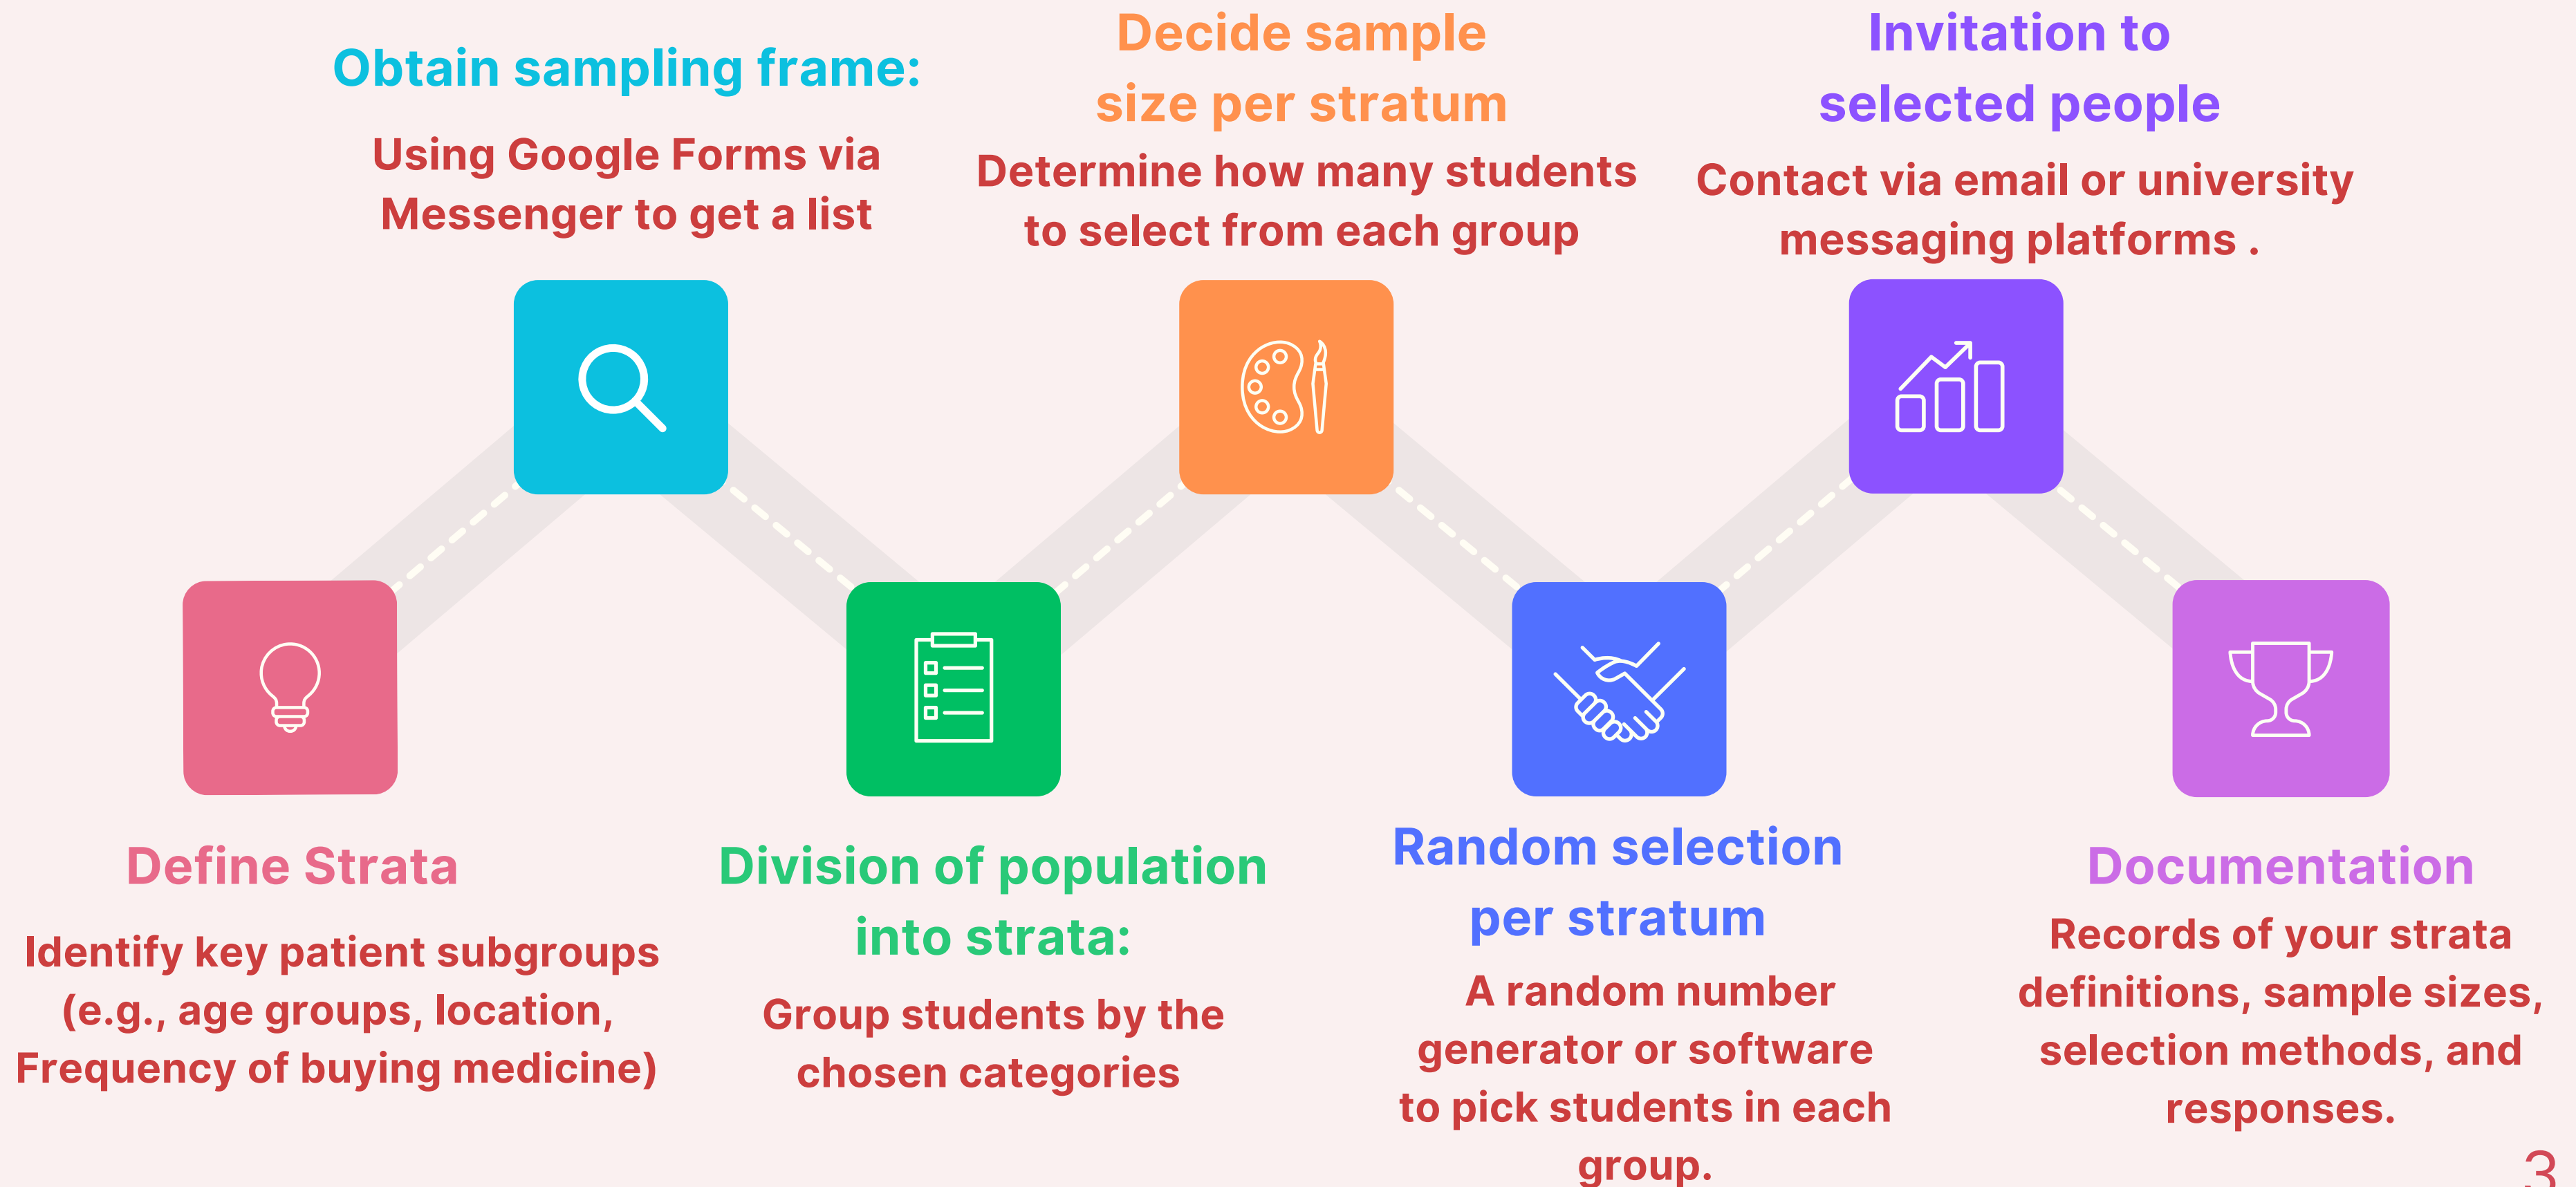

Chosen population
Patients/Customers

Method: Complex
Random – Stratified

Justification for using this method:

- Ensures representation of key customer subgroups (age, location etc)
- Captures diverse user needs across different groups.
- Reduces sampling bias by preventing over- or under-representation of any subgroup.
- Helps design an inclusive system

Sampling Strategy: Steps

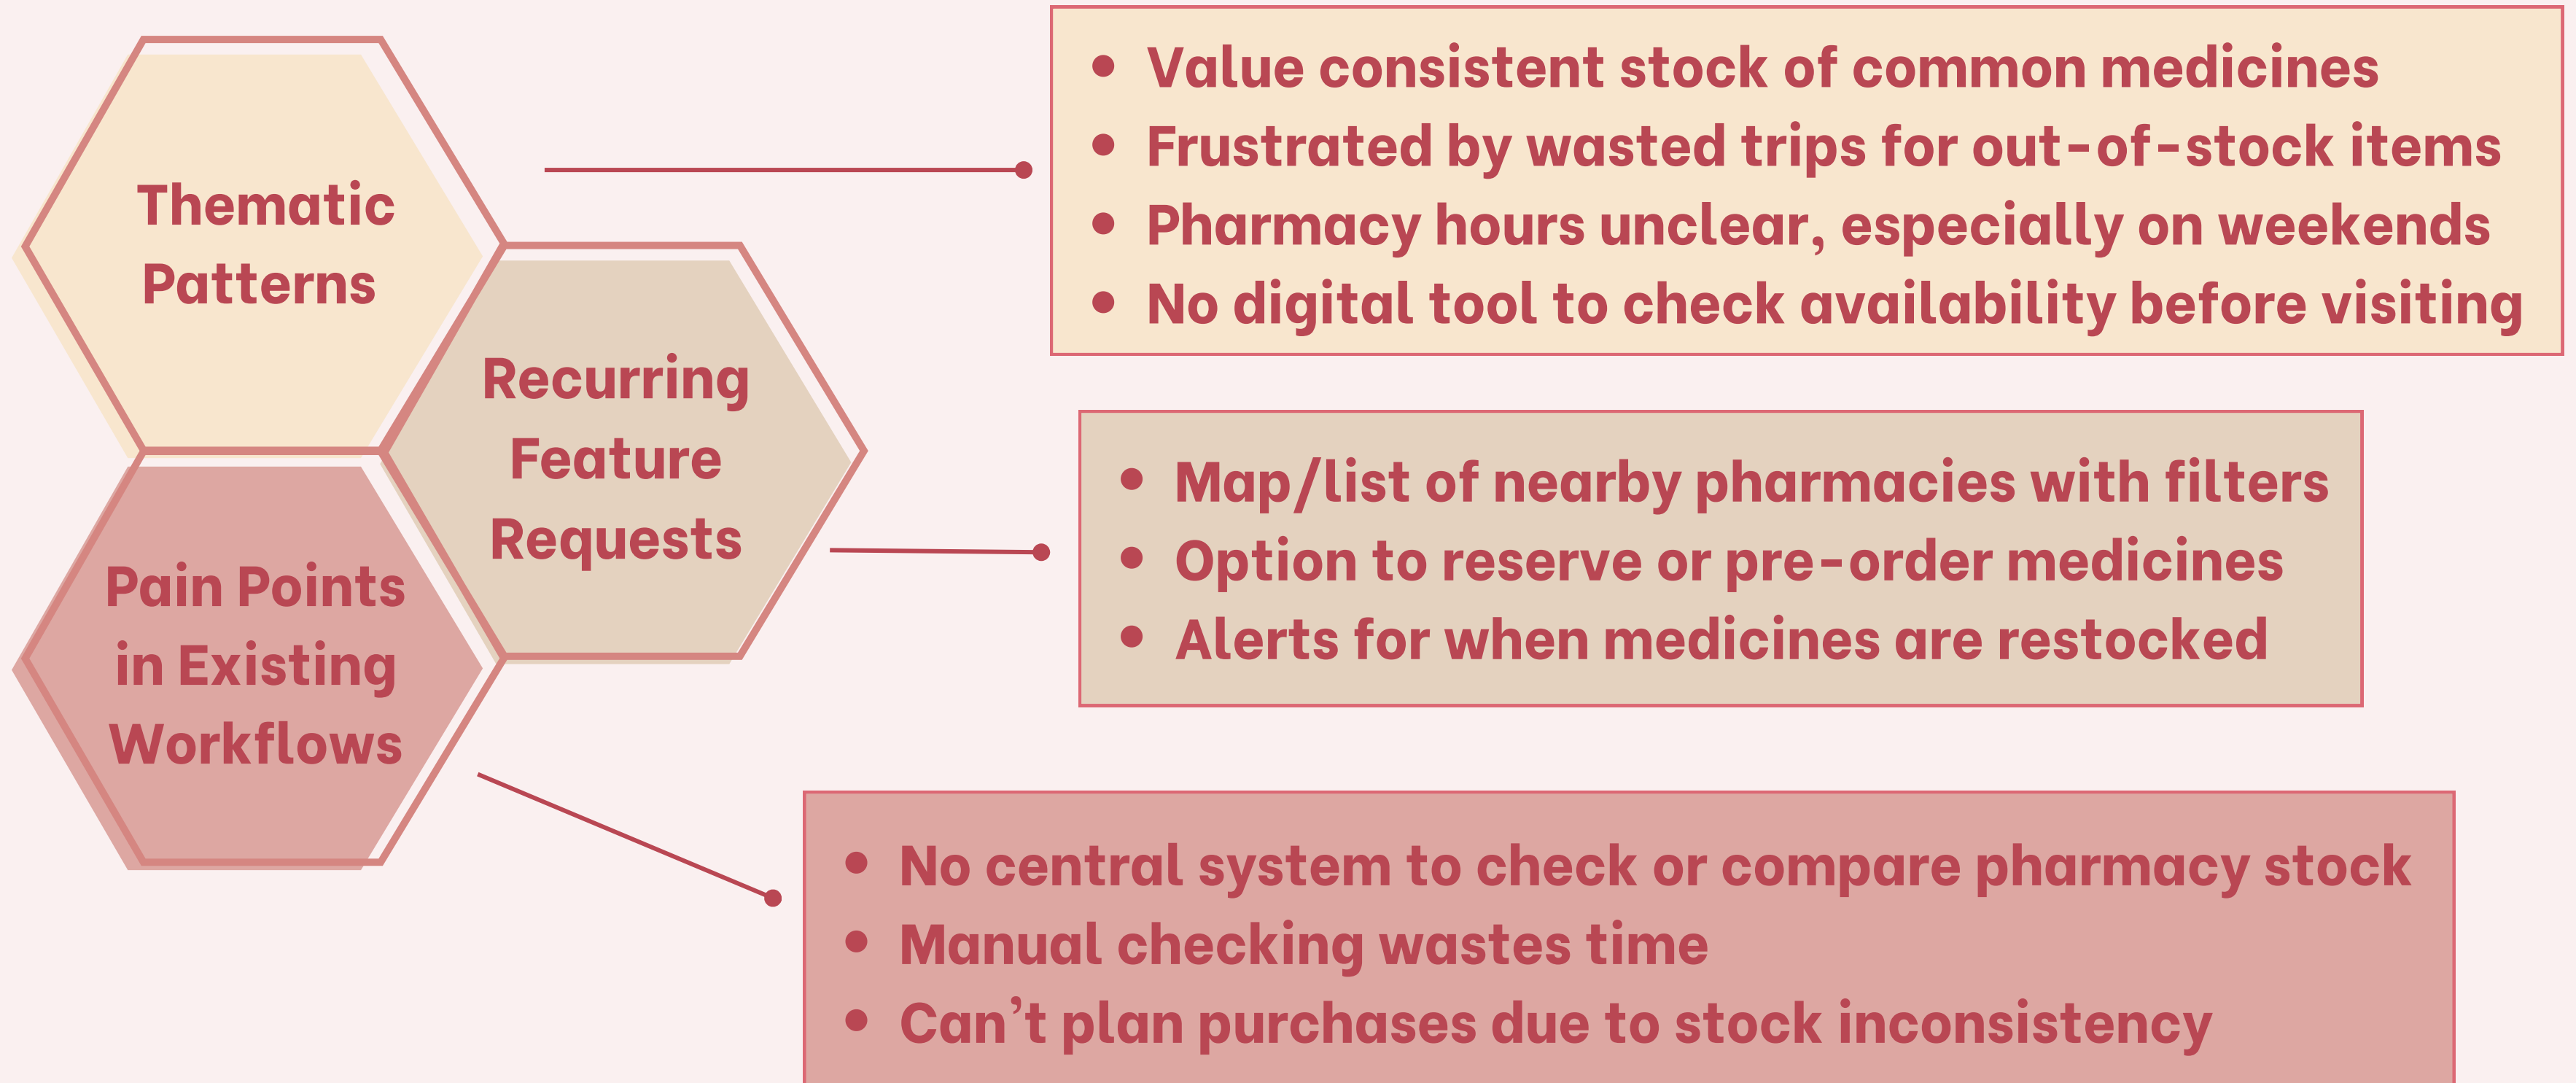

Investigation Plan for Existing Data

Existing Data Sources for MedRadar

Data Source	Type	Description
Pharmacy Inventory Logs	Quantitative	Records of medicine stock levels, restocking dates, sales quantities, and wastage
Customer Feedback Survey Forms	Qualitative	Narrative comments and suggestions from patients about medicine availability and pharmacy services.
Pharmacy Transaction Reports	Quantitative	Monthly summaries of sales, medicine demand trends, and service times.

Investigation Plan for Existing Data

Insights from Customer Feedback Survey Forms

Analyst's Playscript

Actor (User Role)	Information-Related Activity (Script)
Staff	Inspects medicine stocks and expiry dates
	Records low/expired stock manually in notebook
	Notifies Owner/Manager of shortages or expiry
Owner/Manager	Collects stock/sales data from staff, keeps a note
Salesman	Answers availability queries by memory or checking shelves
	Asks stock info to Owner/Staff
Owner	Cross-checks stock with logs/invoices
Salesman	Keep mental note of frequently requested out-of-stock items
Cashier	Handles purchases & payments
	Reports complaints during transactions
Owner	Orders new stock from suppliers
	Shares restocking info verbally or via notes

STROBE Observations

STROBE Element	Observation
Location	Small workspace near pharmacy counter; limited room for movement
Desk Placement	Desk cluttered with paper logs, invoices, and a basic computer or tablet
Stationery	Use of notebooks, pens, and printed stock lists
Props/tools	Barcode scanner, calculator, mobile phone, supplier catalogs nearby
External Sources	Supplier contact info on phones and printed sheets; use of phone calls and messaging apps

STROBE Observations

Key Organizational Themes Observed

- Mixed use of paper and digital records
- Small, crowded workspace
- Heavy reliance on phone and messaging communication
- Staff multitask and may have limited time or hands for device use.

Anecdotal Checklist

Narrative	Office Location, Desk Placement	Stationary & Props	External Source
“It’s hard to find the most recent stock info because everything’s still on paper, nothing’s centralized.”			
“We usually just call or WhatsApp the suppliers. There’s no formal ordering system we follow.”			
“Sometimes orders arrive late, but we’re not sure if it’s our follow-up or if the supplier delayed it.”			

Anecdotal Checklist

Narrative	Office Location, Desk Placement	Stationary & Props	External Source
“During rush hours, the counter gets really crowded. We barely have space to move without bumping into each other.”			
“There’s always a stack of documents and receipts on the desk—it’s hard to find anything quickly.”			
“We’ve had training on the software. It’s not hard to use once you get the hang of it.”			

Thank you!

Feel free to ask any questions!
