IUTian Threads

Lab 6- Information Gathering: Interactive Methods

CSE 4408: System Analysis & Design Lab
July 24, 2025

THE TEAM

**Sadman Shaharier
Mahim
220041133**

**Alfi Shahrin
220041153**

**Nayeemul
Hasan Prince
220041125**

Project Recap

- IUTian Threads is a university-specific, forum-style platform designed for students to share concerns, ask questions, and engage in structured discussions.
- Addresses the current lack of a centralized and effectively moderated issue discussion system at IUT and IUT-OSW.

Sampling Strategy Design

Sampling Strategy - Overview

**Considered
Populations**

**GENERAL
STUDENTS**

**FACULTY
MEMBERS**

**UNIVERSITY
ADMINS**

Chosen Population

Students

Chosen Methodology

Complex random - Stratified Sampling

Sampling Strategy - Justification

(For stratified method)

Representation of key sub-groups

- Academic Year
- Department
- Residential Status etc.

- Reduces sampling bias
- Capture opinion of diverse users' needs
- Equal representation of all sub-groups
- Sub-group based followups
- Deeper analysis based on sub-groups

Sampling Strategy - Steps

Divide Population into Strata

Academic year
Department
Residential Status

Obtain sampling frame:

Source for sampling frame → Use the IUT Registrar's student database

Decide Sample Size

With desired confidence level (95%)
Error margin: ± 0.04

Invitation to Selected People:

Via university emails and messaging platforms (WhatsApp, Messenger).

In Stratum Random Selection

Randomly select from the subgroups preferably based on their ID no

Documentation

Strata definitions, Sampling sizes, Methods and responses.

Investigation of Existing Data

Investigation Plan for Existing Data

Three data sources identified:

Data Source	Type	Description
Archived Facebook Posts	Qualitative	User-generated posts with complaints, suggestions, and ideas revealing pain points and communication style.
Engagement Metrics	Quantitative	Counts of likes, comments, and shares on posts over a 7-day period, showing user interaction levels
Group Posting Frequency Logs	Quantitative	Counts of daily/weekly posts by topic, highlighting activity patterns, peak times, and popular categories.

Selected Data Source & Insights

Insights from Archived Facebook Posts

Behavioral Insights

- Posts spike during results, events, or crises
- Users bypass anonymity using fake accounts
- High engagement on new post in first hour, then fades

System Gaps Revealed

- No tagging or filters — issues get buried
- No upvote/downvote — relevance is unclear
- Valuable posts get overlooked due to low visibility features

Design Opportunities

- Add trending post highlights based on time
- Built-in anonymous posting with identity check
- Use categories to organize post types

Analyst's Playscript & Observation Planning: STROBE

Analyst's Playscript

Actor (Role)	Information-Related Activity (Script)
Student	Submits posts, queries, feedback anonymously or publicly
Moderator	Reviews content, flags issues, engages directly with posts
Administrator	Reviews summarized communication reports, manages policy implementation
Faculty Member	University reports, policy handbooks, journals and newspapers
IT Support	Ensures system maintenance and manages authentication systems

Observation Planning: STROBE

STROBE Element	Observation
Office Location	Administrative building, centrally located within the university
Desk Placement	Arranged close together, cluttered with papers and devices
Stationery & Props	Notebooks, pens, printed logs, computers and calculators
External Information Sources	University reports, policy handbooks, journals and newspapers
Office Lighting and Colour	Bright fluorescent lighting and neutral off-white walls
Clothing of Decision Makers	Formal attire predominantly worn

Anecdotal List

Anecdotal Checklist

Narrative (from Interactive Methods)	STROBE Observation Category	Relationship Symbol
Students feel current communication channels (e.g., Facebook groups, informal chats) are cluttered and unreliable.	General observation, not directly a STROBE element of physical environment	O
Students want faster responses and easier ways to track their queries.	General observation, not directly a STROBE element of physical environment	O
Faculty expressed openness to being involved if moderation responsibilities are clearly defined.	General observation, not directly a STROBE element of physical environment	O
Faculty are concerned about misinformation or disrespectful behavior on the platform.	General observation, not directly a STROBE element of physical environment	O

Anecdotal Checklist

Narrative (from Interactive Methods)	STROBE Observation Category	Relationship Symbol
Delayed moderator response.	Desk PlacementStationery & Props	0
Some faculty currently use informal channels (Whatsapp, Facebook, Messenger) to respond to student feedback.	Desk PlacementStationery & Props	0
Admins and IT staff prioritize strict compliance with university policies and data security.	External Information Sources	0
Overreliance on informal social media channels.	Desk PlacementStationery & Props	0

Thank you!

We are open for Q&A
